Dear xxxxx,

RE: Use of Lokring Products on R410A Refrigerant

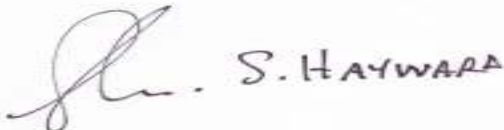

Further to your conversations with regards to using Lokring fittings for joining copper pipe for use on R410A refrigerant applications as an alternative to brazing on sites that ban any hot works such as airside installations at airports.

Mitsubishi Electric can confirm that the use of this product will not compromise the warranty of our products providing that all good refrigeration practices and procedures are undertaken as per any standard refrigeration or air conditioning installation, for example, but not limited to:-

- Strength Testing
- Leak Pressure Testing
- Evacuation
- Additional Refrigerant Charging

If you have any further queries, please do not hesitate to contact me

Yours Sincerely

S. HAYWARD
